1.8	100	Electrician, Apprentice YR 2	Standard (0)
1.9	110	Electrician, Apprentice YR 3	Standard (0)

Why Converting to Lean Services? Business Case

Why converting to S/4HANA Lean Services?

While using MM-SRV is still supported in S/4HANA, MM-SRV documents are not usable with the current SAP Fiori Apps.

Also, simplified new features like the Service Entry App do only work with the 'Lean Services' type of documents.

Also, **Best Practice** scenarios like Central Purchasing require Lean Services and do not support MM-SRV.

Why not using SAP's report in Note 2906140?

Why would you need ASAPIO?

SAP has provided a solution in Note 2906140, which requires manual export/import of data as CSV and does not support attachments and custom fields.

"SAP is prioritizing Lean Services, making it the preferred choice for long-term S/4HANA adoption."

Our Approach: Make migration simple

The ASAPIO consulting service provides tools to reduce the complexity of the migration process by creating master records and contracts directly, instead of performing a semi-automatic download/upload scenario:

Report to migrate Service to Products from ECC to S/4 HANA

Selection parameters

Activity number: 3000050 to

Created On: to

Default values

ASAPIO Offering

What does ASAPIO offer?

- A dedicated ASAPIO consultant supports the migration with the ASAPIO toolkit
- Workshop to decide on customization options
- Test conversion on selected contracts
- Additional tasks can be booked on demand, e.g. custom mappings, custom functions etc.

Delivery Approach?

- Remote delivery, globally (optionally: On-site)
- In English or German language
- Toolkit included

Benefits of using ASAPIO for transitioning to Lean Services

Simplified process: No need to set up the S/4HANA data migration cockpit, making the process easier.

No CSV file handling: Eliminates the need to manually download and upload data via CSV files, saving time and reducing errors.

Automatic creation of service records: Material master records with material type "SERV" are directly generated from service master records, streamlining the process.

Effortless contract creation: Service contracts with both simple and complex hierarchies can be created instantly without hassle.

Support of additional functions: Custom fields and attachments are supported at both the header and item levels, giving you more flexibility.

Flexible target document types: You can define separate (or same) number ranges for migrated contract types, making organization easier.

→ ASAPIO has over 20 years of experience in SAP solutions and is a leading partner in integration, ensuring reliability and success.
